

Jack Codet

jcalifornia123@gmail.com | 949-395-0333 | Miami, FL
github.com/jcalifornia123-commits | jack-codet-portfolio.vercel.app

EDUCATION

University of Miami

Expected May 2028

B.S., Data Science & Artificial Intelligence | Minor in Mathematics

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java

Frameworks & Data: React, Next.js, FastAPI, SQLite, REST APIs

Tools: Git/GitHub, Sentry, Better Stack, Linear, Excel

EXPERIENCE

Product Growth Associate | Everly

Sep 2026 - Present

- Onboarded 10+ early users for an AI-powered health app; continue gathering product feedback.
- Help implement feature and usability changes across the app and website with founders and developers.

Product & Technology Intern | Thunderbird Labs

Jun - Aug 2026

- Built and handed off a client portal with a Next.js frontend and backend and a database for project tracking, billing visibility, and communication.
- Created reusable starter repositories and development guidelines for client projects; integrated an open-source codebase-indexing tool to help developers navigate repositories.
- Connected Better Stack and Sentry to Linear to create error tickets with debugging context.

Manufacturing Operations Assistant | Unit Industries

Jan 2024 - Jan 2025

- Supported inventory tracking, assembly, and order fulfillment for aerospace and commercial manufacturing customers; used Excel and shipment checks to support order accuracy.

PROJECTS

Human Performance Analytics Platform

Jan 2026 - Present

jack-codet-human-performance.vercel.app | Synthetic-data demo; authored coach walkthrough

- Built the original platform with a Python/FastAPI backend, SQLite data model, and Next.js interface to organize training, recovery, and academic-workload data, motivated by training for an Ironman 70.3.
- Published an interactive demo with 84 days of synthetic data, training filters, session details, and a relationship explorer; documented experimental workload scores and downloadable sample data.
- Built an authored coach walkthrough with supporting sample records and accept/reject controls for session-only plan changes; the public demo does not run live LLM inference.

Rhyka | Restaurant-payments project

Ongoing

rhyka.com

- Contribute full-stack/API work and STL prototypes; contact suppliers and speak with restaurant owners.
